

Abb solar container motor does not store energy

Overview

The ABB motor and drive takes excess electrical energy from the grid and uses it to speed up the rotation of the flywheel, so it is stored as kinetic energy. From earth to sky, ABB is supporting Canada's transition to clean and sustainable energy sources. ABB's fully digitalized energy storage portfolio raises the efficiency of the grid at every level with factory-built, pre-tested solutions that achieve extensive quality control for the highest level of safety. ABB's solutions can be deployed straight to the customer site, leading to faster. The different versions of the pre-engineered and industrialized ESM allow scalability, reduction of installation costs, high reliability and re.
