

# **Brazil new solar container battery shell**

## Overview

---

At the exhibition, Lithium Valley showcased its LiFePO<sub>4</sub> battery systems that offer outstanding high-temperature stability and long life cycles — ideal for Brazil's warm climate. Around R\$22,5 billion is expected to be invested in the Brazilian battery market by 2030. The growth is driven by decarbonization targets, surging renewable power installations, and rising electricity demand globally. However, over the last two decades, the mix of installed capacity has changed significantly through the introduction of different energy sources. BESS (Battery Energy Storage Systems) is a major catalyst for solar battery storage nationwide. Why are mobile solar container suppliers across Brazil already booking orders for 2025?

With 37% annual growth predicted in Brazil's distributed solar market (ANEEL 2024) and new tax incentives for industrial battery storage, businesses need 2025-ready quotations now to beat supply chain delays.
