

Can a desk lamp be placed on top of the power storage cabinet

Overview

A clip-on lamp with a clamp width of around 1-2 inches can be attached to the edge of your desk or a nearby shelf, saving valuable desk space. This means if you're right-handed, position the lamp on the left, and if you're left-handed, place it on the right. This prevents shadows from falling across your work as you write, type, or take notes. To connect the power supply, I cut a small hole in the back of the cabinet with a utility knife to run the cable.
