

Catl solar container factory domain

Overview

0 (Cell-to-Pack) high-end battery pack production lines within the “Seres Super Factory” in Chongqing. This marks CATL’s first operational base in Chongqing and, notably, its inaugural adoption of a “factory-in-factory” (FiF). At full capacity, the gigafactory will produce up to 50 GWh, enough to power around one million electric vehicles. It is understood that the first factory in Germany has a planned capacity of 14GWh. (CATL) has made this Brochure as comprehensive and accurate as possible on the basis of the existing information, but reserves the right to modify the data, parameters and other information without further notice! CATL. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Ships as two separate sections to stay within regular shipping weight limits, then one stacks on top of the other. CATL catapults itself into the record books after unveiling the TENER Stack, the world’s first.
