

Compressed air solar container blasting

Overview

The basis of our portable 'Containablast' units is a new robust shipping container which lends itself perfectly for conversion. The container is then modified to house a host of equipment providing a self contained portable blast room, simply requiring compressed air and electrical. Airblast AFC is known for its market-leading dust collection technology, which offers excellent visibility when blasting. Air blasting is a critical step in the finishing process that uses compressed air to propel abrasive media against a work surface for various applications, including rust and scale removal, anchor pattern creation, cosmetic finishing, coating removal, shot peening, cleaning, and restoration after.

Compressed air solar container blasting

Compressed Air Dryer for Sandblasting & Abrasive ...

Van Air Systems offer compressed air dryers, single deliquescent towers, deliquescent desiccants, and filters for abrasive blasting & coating applications.
