

# Home solar container and portable solar container

## Overview

---

These innovative, modular living units aren't just mobile—they're powered by integrated photovoltaic systems, making them a self-sustaining housing solution for off-grid and urban applications alike. Before, portable housing was always equated with compromise—low comfort, insecure power delivery. With its transportable convenience and environmental efficiency, it stands at the forefront of renewable energy solutions. Thanks to foldable solar arrays, the container is rapidly deployable — operating within hours to support power needs across diverse scenarios. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.

## Home solar container and portable solar container
