

How long does citizen store energy

Overview

This stored energy helps run the watch for up to 6 months before it needs to be recharged, no matter if it was in total darkness. Yet, some models of Citizen Eco-Drive watches are built with an incredible power save function. According to Citizen Europe, laboratory tests showed that after 20 years the secondary battery retains a power storage capacity of 80% of its initial capacity. Citizen has to some extent, acclimatized us to advanced technology in general and long power reserves in particular but the Eco-Drive 365's one year reserve is about double that found in previous Eco-Drive watches.

How long does citizen store energy
