Overview

We got one of those all plastic, 3 drawer storage chests, put a couple pieces of Velcro tape on the back to attach it to the console bulkhead and use it to store foul weather gear, first aid and tool kit, flashlight, jackets, etc. I am probably going to make an aluminum frame out of square tubing for a battery rack. But should I have them low or up higher for more floor space?

I freed up some forward storage space with a T-bag for the T-top. A well-engineered boat console organizer with cup holder is not merely a convenience; it is a critical upgrade for vessel organization and safety. A square of Dri-Dek can be placed under the battery case to allow water to drain. I know that a 55lb bow mount trolling motor is strong enough to move this boat, but I was considering going stronger with a 80lb Minnkota Riptide.
