

How much is the appropriate degree of home solar container

Overview

The most effective angle for solar panels typically lies between 30 to 45 degrees, depending on your geographical location. Areas nearer to the equator may find that a shallower angle is beneficial, while locations further north or south may need steeper inclinations to optimize. I am trying to build a solar powered container unit of 8x8x16 that will be temperature and probably humidity controlled for interior temps above 80 degrees and humidity above 30%. This can vary depending on your north-south location, but it generally ranges from 30-45 degrees for homeowners in the continental United States.
