

Hybrid corolla abs solar container low voltage

LPW48V100H
48.0V or 51.2V

Overview

Discover effective solutions to fix the Toyota C1241 code related to battery voltage issues affecting your ABS/VSC control module. Recently I had issues with the battery on my Corolla TS (MY24) and maybe someone will use my experience and maybe someone will be able to help me out a little before I go to the dealership. It has stopped working twice now saying Hybrid System malfunction and parking system malfunction. If it sees less voltage (threshold value) than it prefers, it won't allow the ICE to start. Get expert tips now!
