

Independent solar container project looking for funding cooperation

Overview

Nonprofit organizations and foundations often provide grants specifically aimed at renewable energy initiatives, making them a valuable resource for NGOs looking to implement solar projects. Researching local, state, and federal programs can uncover opportunities that align. Department of Energy (DOE) Solar Energy Technologies Office (SETO) supports funding opportunities across its research areas. Community-based solar projects are pivotal in the transition towards sustainable energy solutions. RE-volv is an equity-informed, clean energy access organization that helps nonprofits in underinvested communities across the country go solar, while raising awareness about equitable climate solutions, and training the next generation of clean energy leaders.
