Overview

The container is equipped with foldable high-efficiency solar panels, holding 168–336 panels that deliver 50–168 kWp of power. It is the perfect alternative to unstable grid power and diesel generators, keeping operations running even in remote areas or where infrastructure is. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. LZY offers large, compact, transportable, and rapidly deployable solar storage containers for reliable energy anywhere. Sensitive solar arrays can be effectively protected from storms, vandalism and all possible threats.
