## Overview

---

Solar container is a stand-alone power generation plant that houses solar panels, batteries, inverters, and control system—all within a standard shipping container. It is plug-and-play deployable, often to locations where traditional infrastructure is lacking or unreliable. As the need for decentralized, mobile, and clean energy increases, solar containers are emerging as a promising and scalable solution. These containers are revolutionizing the way solar energy is deployed, particularly in remote areas, disaster relief zones, military.
