## Overview

---

Prime Minister Kurti emphasized that this energy storage system will enhance the security and reliability of the energy supply. With renewable energy capacity growing at 12% annually since 2022 [1], the country's aging grid infrastructure struggles to handle solar and wind's intermittent nature. Kosovo's recent Energy Strategy sets an ambitious vision to achieving a just energy transition for the country between 2022-2031. In 2022, Kosovo made headlines with a 200MWh battery storage project [2] [3], funded by a \$234 million U. Fast forward to 2025, and the country is rewriting its energy script, one lithium-ion cell at a time. The US-based Pomega Energy Storage Technologies, specialising in lithium iron phosphate battery production, will install a 62-megawatt (MW)/104-megawatt-hour (MWh) battery energy storage system (BESS) at the Oslomej 80-megawatt-peak (MWp) solar plant in North Macedonia, operated by the Turkish.
