

# **Kosovo large ups solar container battery**

## Overview

---

While lithium-ion batteries dominate headlines, Kosovo's project leans on LFP (Lithium Iron Phosphate) cells for safety and durability [8]. The new battery energy storage system (BESS) combines lithium-ion technology with advanced energy management software. Think of it as a giant "power bank" for the grid – storing excess solar and wind energy during peak generation periods, then releasing it when demand spikes. Kosovo's electricity generation is almost entirely dependent on two ageing lignite plants: Kosov integration of renewable energy sources.
