

# **Large solar container project description epc**

## Overview

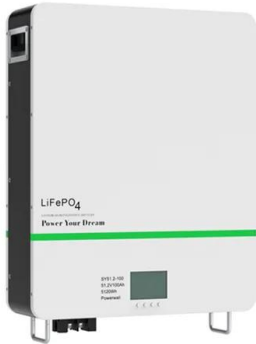

---

Solar EPC project management involves coordinating the engineering, procurement, and construction activities needed to deliver a functional solar power system. In practice, this means the EPC contractor designs the project and buys all the needed equipment/ materials, and builds. It's a project delivery model that oversees the solar installation process from design through to completion.

## Large solar container project description epc

---

### Daily work summary of solar container sales epc
