## Overview

---

On September 3, Trina Storage proudly achieved the world's first UL Verified Mark certificate for thermal performance of its liquid-cooled energy storage containers, issued by UL Solutions, a renowned global certification authority. Sungrow will have new products on display at the RE+ tradeshow, including a second-generation modular inverter for utility-scale PV projects; the next-generation PowerTitan 3.0, an AC Block BESS for large-scale energy storage applications; and the PowerStack 255CS BESS for C&I energy storage. This hybrid hero stores 50 kWh of electricity (thank you, LiFePO<sub>4</sub> batteries) and a whopping 500 kWh of heat (courtesy of phase-change materials that work harder than a. The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Effective thermal management is necessary for maximizing both the performance and longevity of solar cells and batteries. Having worked closely with various cold chain logistics companies and engineers specializing in sustainable energy solutions, I have seen firsthand how.
