

Latest progress of Indonesian pumped storage power station

Overview

State power utility PT PLN is accelerating Indonesia's clean energy transition through cooperation agreement with the European Union, Germany's KfW Development Bank, and infrastructure development PT Sarana Multi Infrastruktur (SMI) to develop large-scale renewable pumped storage. The Upper Cisokan Pumped Storage Plant is a proposed pumped-storage hydropower facility in Indonesia, due for completion by 2025. [1] The plant will be located 40 km (25 mi) west of Bandung in West Java, Indonesia, and its two reservoirs will occupy area in West Bandung Regency and Cianjur Regency. Indonesia's state-owned, vertically-integrated power utility, PT Perusahaan Listrik Negara (PT PLN) invites expressions of interest by 12 August from eligible consulting firms to undertake an updated Environmental and Social Impact Assessment (ESIA) and prepare all relevant documentation to comply.

Latest progress of Indonesian pumped storage power station

Pumped Storage Tracking Tool: International Hydropower Association

The tool shows the status of a pumped storage project, its installed generating and pumping capacity, and its actual or planned date of commissioning. ? Learn more about pumped storage hydropower. ...

Indonesia's Pumped Storage Power Plant Project with ...

After a temporary suspension of financing and various other circumstances, it was decided in September 2022 that the project would be refinanced by the World Bank and other sources, and full-scale ...

Indonesia's First Pumped Storage Hydropower Plant to Support ...

UAE-based energy company Masdar and PLN Nusantara Power (PLN NP) have reached an agreement to expand phase II of the Cirata floating photovoltaic (FPV) power plant in Indonesia by 500MW.

Upper Cisokan Pumped Storage Power Plant

In 2019, a new loan agreement with the World bank was found, and the facility was expected to become operational by 2025, according to Indonesia's Electricity Supply Business Plan.

Indonesia's First Pumped Storage Hydropower Plant to Support ...

The World Bank's Board of Executive Directors today approved a US\$380 million loan to develop Indonesia's first pumped storage hydropower plant, aiming to improve power generation capacity ...

Overview of Pumped Storage Hydropower Systems and Their ...

Indonesia has potential to develop pumped storage hydropower because of Indonesian location in the mountain and hill. Nowadays Indonesia first pumped storage hydropower system still builds in Upper ...
