

Nandu solar container installation

Overview

Described as Zambia's inaugural solar facility equipped with battery storage, the project holds an estimated value of \$65 million. It is slated to commence commercial operations by September 2025, aiming to supply electricity to a minimum of 65,000 households. A mobile solar container is essentially a plug-and-play power station built inside a modified shipping container. It combines photovoltaic panels, charge controllers, inverters, and lithium or hybrid battery systems into one durable, transportable package. In 2023 alone, global energy storage deployments jumped 45%, and companies like Nandu are leading the charge. Our integrated solar installation services + energy storage systems ensure that you have reliable electricity even during power outages! Why Go Solar With Us?

We provide individualized solar solutions tailored to the unique needs of southern California homeowners, building owners, land owners, and. Are you ready to harness the power of the sun and take control of your energy future?

Green California offers expert solar installation services in Los Angeles, CA, empowering homeowners to embrace sustainable energy solutions and reduce their carbon footprint.
