## Overview

---

8% annual energy demand growth (NEA 2024 forecast), strategic storage deployment is crucial. EK SOLAR's roadmap aligns with national priorities: Think of these containers as energy batteries – storing monsoon surplus for dry. Alternative Energy Promotion Centre (AEPCC) is a National focal agency with the objectives to promote the use of renewable energy technologies, upgrade the living standard of the rural people, support in protecting the environment and develop commercially viable renewable energy industries in the available flat terrain, and consequently estimate the energy storage gradients, large flow fluctuations, and prevalent energy demand grid in the region is predominantly from the run-of-river hydropower plants. Numerous previous studies have examined run-of-river and storage-type hydropower. Around 20% of Nepal's total energy consumption is made up of modern energy sources including electricity, petroleum, and renewables, and this percentage is steadily rising and can be attributed to Nepal's brisk urbanization. Nepal's solar market is split into two distinct segments: the established off-grid sector serving rural communities and the growing grid-tied sector supporting national energy infrastructure.
