

# **New york substation solar container**

## Overview

---

The storage plant consists of five 53-foot walk-in enclosures, each with more than 19,500 batteries grouped in modules and stacked in racks. Each container pulls in and can disperse 4 MW of power, enough to power roughly 3,000 homes. There has been a 90 percent drop in the cost of batteries over the last 15 years as new factories have come on line, resulting in significant growth in this sector. It can help to integrate renewable generation resources, like solar, into our energy system to strengthen it for years to come. As part of our Clean Energy Commitment and in support of New York State's Climate Leadership and Community Protection Act (Climate Act), we're dedicated to helping the. ALBANY — The New York State Public Service Commission (Commission) today confirmed granting the construction and operation of a battery-based energy storage facility with a capacity of up to 100 megawatts (MW) located in Astoria, Queens. As of January 2026, there are 165 solar projects in development in New York, according to.

## New york substation solar container

### Spill Prevention Control and Countermeasure Plan
