FLEXIBLE DEPLOYMENT

## Overview

---

This €180 million initiative isn't just another battery farm; it's like giving the entire island a giant charging bank for sunny days and windy nights. The project combines: Remember that time your phone died during an important call?

. Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellín - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for the national grid. Higher costs of €500-€750 per kWh are driven by higher installation and permitting expenses. [pdf] • The distance between battery containers should be 3 meters (long side) and 4 meters (short side). Ever wondered how a Mediterranean island like Cyprus could become energy-independent?

Enter the Nicosia Electric Energy Storage Project - a game-changer that's turning heads in the energy sector. Each 2 MW storage block operates independently, allowing phased capacity upgrades without system downtime. In Nicosia, solar power generation and energy storage are being enhanced through various projects: A distributed micro-generation complex is proposed, which connects to the electrical power grid and utilizes energy storage systems, focusing on photovoltaic energy<sup>1</sup>.
