# **Ouagadougou new solar container power station**

## Overview

---

Since 2022, Bairen Energy Storage has deployed 47 battery energy storage systems (BESS) across West Africa. Their Ouagadougou flagship project—a 20MW/80MWh lithium-ion facility—powers 15,000 homes after dark using solar energy captured during daylight. With ECOWAS countries pledging 35% renewable integration by 2025, Ouagadougou's success is already influencing neighboring nations. The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. The power station was developed by a consortium led by GreenYellow, a French IPP and subsidiary of the Casino Group, in partnership with a group of financiers and donors referred to as the Africa Energy Coopération (AEC).
