

Phase change solar container cold storage

Overview

To address this issue, thermal energy storage technology has emerged as a viable solution. This paper presents a comprehensive systematic review of phase-change material (PCM) applications in solar refrigeration systems. Photovoltaic phase-change cold storage mobile container is a revolutionary cold chain product, combining HeatMate's self-developed nano-eutectic phase change energy storage materials, high efficiency monocrystalline silicon solar modules, international standard containers and advanced refrigeration. A 40ft container was used, which was installed with ten plate-like TES units containing PCM and a charging loop. Based on the temperature of utilisation, the paper discusses the physiro-chemical problems inherent with a phase.
