

# **Preferential policies for solar container technology**

## Overview

---

Governments worldwide have introduced a variety of preferential policies aimed at boosting energy storage deployment. — Today the Solar Energy Industries Association (SEIA) is unveiling a new policy agenda that details the critical actions that local, state, and federal leaders must take to strengthen the reliability of America’s electric grid with solar and storage technologies. The confluence of an uncertain future for the Inflation Reduction Act (IRA), escalating import tariffs and evolving state-level responses threaten to reshape the economic and growth trajectory of both commercial and industrial (C&I) and community solar projects. However, challenges like high initial investment costs, technological conflicts, and regulatory barriers are more pronounced in certain regions.
