

Recharge solar container card at gas station

Overview

These robust self-contained units are fully operational with just a single power hook up. Perfect for adding additional charge stations for large events or for temporary or long-term requirements. This month, Sano Energy completed a solar energy storage and EV charging project at a gas station. INHABIT Solar reFueling Stations are architectural, modular, scalable, prefabricated, ship preassembled, utilize smart helical pile foundation systems, and are rapidly installed. To start, running multiple refrigerators, air conditions and lighting, inside and outside, 24 hours a day can cost thousands of dollars each month especially with current high utility prices. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.

Recharge solar container card at gas station

Instant Off-Grid(TM) Shipping Containers with Solar and Batteries and AC+

We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.
