

# Silicone solar container device

## Overview

---

The containerized mobile foldable solar panel is an innovative solar power generation device that combines the portability of containers with the renewable energy characteristics of solar panels. We provide commercial solar sign & flood lighting systems along with a large selection of landscape lights. We offer our customers both passion and purpose in sustainable product design, development, and manufacturing. The ECOSIL 14 is an advanced automatic silicone dispenser designed to enhance the assembly process of photovoltaic modules by accurately dispensing silicone or two-component glue onto the frames. This machine ensures a uniform application, optimizing the sealing and structural integrity of PV. How do you want your items?
