

# **Sodium battery solar container project**

## Overview

---

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the Solar Technology Acceleration Center (SolarTac) in Watkins, Colorado. The ever-increasing energy demand and concerns on scarcity of lithium minerals drive the development of sodium ion batteries which are regarded as promising options apart from lithium ion batteries for energy storage technologies. The renewed interest is being driven by rising lithium costs, tighter mining regulations. As global energy transition accelerates, off-grid solar and microgrid projects increasingly form backbone of rural electrification, industrial backup, and resilient community power.
