

Solar cell solar container lithium battery

Overview

Folding PV arrays in the container — capture sunlight efficiently, designed for quick deployment and durable outdoor operation. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Designed to meet the growing demand for sustainable and mobile power, especially. We combine high energy density batteries, power conversion and control systems in an upgraded shipping container package. Lithium batteries are CATL brand, whose LFP chemistry packs 1 MWh of energy into a battery volume of 2. Containerized energy storage system uses a lithium phosphate battery as the energy carrier to charge and discharge through PCS, realizing multiple energy exchanges with the power system and connecting to multiple power supply modes, such as photovoltaic array, wind energy, power grid, and other. A mobile solar container is a factory-built, transportable unit that integrates solar panels, battery storage, and power controls—providing plug-and-play, rapid-deploy clean electricity for remote sites, events, and emergency response.
