

Solar container and new energy electrician job content

Overview

As a solar electrician and apprentice, you will be installing electrical service equipment, wiring, and electrical equipment for commercial solar systems. Electricians with solar expertise are critical for solar companies as they will set up and ensure the electrical components of a PV system are working properly, and troubleshoot any problems. While all installation and operations roles require a basic understanding of the electrical system. Supervise and train apprentice electricians/coworkers to teach proper, safe use of tools and maintenance procedures. High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and a?

| Shipping container solar systems are transforming the way remote projects are powered.
