

# Solar container battery soh

## Overview

---

State of Health (SOH) refers to a battery's overall condition compared to its original performance when new. It is usually expressed as a percentage, representing the remaining usable capacity, internal resistance, and operational stability of the battery. In the energy storage industry, energy storage batteries are a common energy storage device. However, battery performance degrades over time and conditions, requiring monitoring and evaluation of battery health. Not sure how to choose the right battery for your energy storage project?

This all-in-one guide explains the key performance metrics buyers must understand—SOC, SOH, cycle life, and more.
