

Solar container box temperature detection report

Overview

Our refrigerated container monitoring system utilizes our industry-leading wired and wireless temperature sensors to actively track and monitor the temperature and location of reefer shipping containers and valuable cargo. This is the temperature at which the total radiation from the container to ambient is the same as the radiation from the sun through the exposed area. The mecSOLAR series is one of the most versatile asset tracking solutions in the world designed in cooperation with mecomo partner.

Solar container box temperature detection report

Outdoor solar container box temperature

I am trying to build a solar powered container unit of 8x8x16 that will be temperature and probably humidity controlled for interior temps above 80 degrees and humidity above 30%.
