

Solar container closing method

Overview

This manual addresses why these sorts of boxes are replacing remote power supply, what the components of the whole system are, how to wire and install it safely along with handy facts, industry jargon and best-practice references. To ensure the safety of loading, unloading, unpacking and storage of PV modules, please read this manual carefully. Disclosed is a system for closing containers that includes a support frame, a container feeding station and a lid closing assembly. Capacitor Discharge Welding works based on the principle of discharging stored electrical energy from capacitors through the workpieces to create a weld. The capacitors store a high voltage charge, which is discharged through the weld zone, generating an intense current flow for a short duration.
