

# Solar container identity

## Overview

---

The Solarcontainer represents a grid-independent solution as a mobile solar plant. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. Designed for versatility and rapid deployment, these self-contained solar systems bring electricity to locations where traditional power is unreliable or nonexistent. Below is a narrative description of how a solar-powered shipping container is revolutionising the face of access to global energy, off-grid energy, grid backup, and clean development for applications ranging from European building sites to African communities and the rest of the globe.
