

Solar container subsidies are coming

Overview

Although the federal 30 % solar tax credit for customer-owned systems expired at the end of 2025, there are still ways for homeowners to capture significant savings through state rebates, tax incentives, and net metering programs —especially if you design and procure your system. As 2026 approaches, the landscape of federal incentives for solar energy is shifting dramatically. But subsidies and excess production capacity have reshaped global solar manufacturing, with risks for trade and supply chain resilience. The proliferation of these projects displaces affordable, reliable, dispatchable domestic energy sources, compromises our electric grid, and denigrates the. Massive Federal Investment Available: The EPA’s Solar for All Program represents the largest federal solar grant investment in history with \$7 billion allocated across all 50 states, targeting over 900,000 households. Solar energy has been gaining momentum as a clean and renewable power source, but its growth often depends on subsidies that make it more affordable.
