

Syria solar container power station construction

Overview

A consortium led by Qatar's UCC Holding will develop a 1-GW solar power plant in southern Syria as part of a broader USD-7-billion (EUR 6.2bn) agreement with the local government designed to strengthen energy security and support the reconstruction of infrastructure in the war-torn. Syria is moving forward with the construction of a 300 MW solar power plant in collaboration with a UAE-based company, signaling a significant advancement in its renewable energy ambitions. The Ministry of Energy in the Syrian Arab Republic today signed the final concession agreements to build and operate eight new power generation stations with a total capacity of 5,000 megawatts, with the international consortium led by Urbacon Holding, through its subsidiary Urbacon Concessions. Syria's new photovoltaic power station would be built outside Damascus [Getty] Syria's ministry of electricity has announced a new 100-megawatt photovoltaic power station to be built to tackle the nation's energy crisis, following over a decade of unrest and economic uncertainty in the country.
