

# The latest news on xihai s new solar container policy

## Overview

---

The analysis reveals that three converging factors -- polysilicon consolidation, supply-side production cuts, and the cancellation of China's 13% VAT export rebate -- will drive solar module prices up by approximately 9% in Q4 2025, with further increases expected through 2026. China's solar power installations jumped by 30% in October from September, as capacity additions rebounded from the summer months, which had seen a new renewables pricing mechanism alarming investors. On September 20th, the first phase lithium carbonate project of Luopu Xihai New Energy Materials Co. was put into operation at the Kungang Economic and Technological Development Zone (Nonferrous Metals Industrial Park) in Luopu County, Hotan Prefecture, Xinjiang Uygur Autonomous Region. China's 2025 renewable energy policy shift marks a move from fixed feed-in tariffs (FITs) to a market-driven pricing model for solar PV. 4 -- At a new energy industry investor briefing organized by the Star Market, solar panel makers listed on Shanghai's Nasdaq-like trading board emphasized energy storage expansion and welcomed a government-led anti-involution campaign intended to curtail fierce low-price competition.

## The latest news on xihai s new solar container policy

### What Does China's Renewable Energy Policy Shift Mean for Global ...

As the world's largest solar manufacturer, China's policy changes are causing international module prices to rise, exacerbating ongoing trade and tariff disputes.

### Qingdao's Xihai'an New Area drives maritime economy with ...

According to Sun Yonghong, an official of the working committee of the Xihai'an New Area, the new area has made a three-year plan and rolled out 16 forceful measures to reinforce its ...
