

# Total solar container shipments in 2022

## Overview

---

solar capacity has boomed, which includes both utility-scale solar farms (with one megawatt of capacity or more) and small-scale solar,” the EIA said. In 2022, solar photovoltaic panel shipments in the United States increased 10% from 2021, setting another annual record (31.7 million peak kilowatts, data released by the Energy Information Administration shows. The volume of shipments has grown by more than sixfold in the past decade, as the price of photovoltaic cells have fallen, while incentives and.

## Total solar container shipments in 2022

---

### Shipping costs remain key challenge for solar sector

The solar industry will face elevated shipping costs and supply disruptions for at least another year until the global ocean freight system starts to normalize.

### 2024 Monthly Solar Photovoltaic Module Shipments Report

Data source: U.S. Energy Information Administration, Form EIA-63B, Annual Photovoltaic Module Shipments Report Note: Monthly data for 2024 are based on a subset of the largest manufacturers ...

### Special Report on Solar PV Global Supply Chains

This special report examines solar PV supply chains from raw materials all the way to the finished product, spanning the five main segments of the manufacturing process: polysilicon, ingots, wafers, ...

### Solar panel shipments set a record in 2022 but uncertainty over

Some of the projects slated for 2022 were canceled or delayed until 2023 due to solar panel supply-chain problems. This included solar panel shipments stopped at the U.S. border as ...

### 2022 Annual Solar Photovoltaic Module Shipments Report

Table 1. U.S. photovoltaic industry status, 2022  
Not published for 2022 Module value, total shipments (thousand dollars) Data source: U.S. Energy Information Administration, Form EIA-63B, Annual ...

### Annual Solar Photovoltaic Module Shipments Report

Table 5. Not published for 2022. Table 6. Inventory and Total Available for Shipment data are not published because of poor data quality. Individual data for crystalline silicon, thin film, and ...

### Solar panel shipments set a record high in 2022 as ...

The average value of solar panels shipments increased 15% from 2021, amid rising inflation, higher material and shipping costs, and continued supply chain constraints.
