

What is a large-scale solar container battery plant

ESS

Overview

These might look like shipping containers in the desert, but they are actually the key to unlocking a clean energy revolution. Across California, installations of mega batteries store power from renewable sources and distribute it when people need it most. Backed by \$2 billion in private capital, Arevon's Eland project can meet 7% of LA's energy needs — cutting costs, curbing outages, and building a more resilient grid. One of the US's largest solar + battery storage projects is now fully online in Mojave, California.
