OUTDOOR BATTERY CABINET

## Overview

---

Inflation Reduction Act now covers solar panel containers as “energy storage infrastructure,” granting 30% tax credits until 2032. Pair this with state-level rebates like New York’s \$1,500/kWh incentive, and suddenly your \$20k system costs \$11,900. Massive Federal Investment Available: The EPA’s Solar for All Program represents the largest federal solar grant investment in history with \$7 billion allocated across all 50 states, targeting over 900,000 households. Local solar projects help LADWP to meet renewable energy targets and reduce the carbon footprint created by fossil fuel-burning power plants. Solar also brings economic benefits for LA as a catalyst for creating jobs and stimulating the green economy. The programs below can help you save a lot of money on the installation—and earn money back through rebates and net metering.
