## CONTAINER TYPE ENERGY STORAGE SYSTEM

Energy storage system

FC RoHS CE 

## Overview

---

“The system operates by routing excess energy from solar PV farms to an air compressor that fills out storage tanks to high pressures at around 20 to 30 bar. Compressed-air-energy storage (CAES) is a way to store energy for later use using compressed air. To finalize the loan guarantee from the Department of Energy’s Loan Programs Office (LPO), Hydrostor. They claim their prototype could compete with commercially available compression-cooling air conditioners.
