

# **Wind and solar container charging pile**

## Overview

---

It serves as a rechargeable battery system capable of storing large amounts of energy generated from renewable sources like wind or solar power, as well as from the grid during low-demand periods. There are many ways to skin a cat, and even more ways to add solar power to a shipping container. Their inherent purpose is portability, making them ideal to use where grid electricity is unavailable, like disaster relief or military operations. Sano Energy provides smart power energy solutions such as EV charger piles and stations, DC chargers, and AC chargers. Realize zero carbon power supply in the service area through wind power generation and photovoltaic power generation, ensure that the annual renewable energy power generation is greater than the annual power consumption in the service area, increase the proportion of renewable energy power.
